UTAH - WEEKLY INFLUENZA SUMMARY MMWR Week 5 (01/28/07 - 02/03/07) - Posted 02/07/07

UTAH - WEEKLY INFLUENZA TEXT SUMMARY

Influenza Activity in Utah:

Influenza and other respiratory viruses are circulating in Utah at this point. Influenza-like illness activity remains low, but is increasing Seventy-five influenza-associated hospitalizations (51 Type A, 18 Type B and 6 Unknown) have been reported to the UDOH as of present. This website will be updated every Wednesday by 1:00 PM.

As of 2/07/2007, no pediatric influenza-associated deaths have been reported in Utah for the current season.

National influenza surveillance data can be found at www.cdc.gov/flu. Please note, states determine for themselves how to estimate weekly influenza activity. The classification system used in Utah primarily serves to provide a geographical description of how influenza is circulating in the state

INFLUENZA PREVENTION

How to protect yourself and others:

- 1. Utahns should get an influenza vaccine.
 **Contact your provider or the Immunization Hotline (1-800-275-0659) to locate an influenza shot
- 2. All Utahns should practice "respiratory etiquette" to reduce the spread of respiratory diseases ** Stay away from other people when you are sick
- ** Cover your mouth and nose with a disposable tissue when you cough or sneeze. Throw the tissue away
- ** Wash your hands.
- 3. We urge schools and employers to be supportive of these preventive measures.
